

# CALL FOR PAPERS

**ICSSARMC 2021**  
**Mar 25-26, 2021**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSSARMC 2021 : International Conference on Slope Stability Analysis and Rock Mass Classification is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Slope Stability Analysis and Rock Mass Classification. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Slope stability analysis  
Limit equilibrium analysis  
Analytical techniques: method of slices  
Swedish slip circle method of analysis  
Ordinary method of slices  
Modified bishop's method of analysis  
Lorimer's method  
Spencer's Method  
Sarma method  
Comparisons

Rock slope stability analysis  
Limit equilibrium analysis software  
Limit analysis  
Stereographic and kinematic analysis  
Rockfall simulators  
Numerical methods of analysis  
Continuum modelling  
Discontinuum modelling  
Hybrid/coupled modelling  
Rock mass classification
