

CALL FOR PAPERS

ICDMHI 2021
Mar 08-09, 2021
Bangkok, Thailand

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDMHI 2021 : International Conference on Data Mining in Health Informatics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Data Mining in Health Informatics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Health data mining	Healthcare decision-making
Data mining in health informatics	Disease management
Applications of data mining	Feedback integration
Clinical care	Challenges of data mining in health informatics
Data mining in clinical decision support systems	Legal and ethical issues
Administration of health services	Data mining for healthcare management
Medical research	Challenges in data mining for healthcare
Data warehousing in health informatics	Prominent models
Data warehouses vs. real-time databases	Future directions
Evidence-based medicine
