

CALL FOR PAPERS

ICFTBMD 2021
Mar 22-23, 2021
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFTBMD 2021 : International Conference on Flexural-Torsional Buckling and Modern Developments is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Flexural-Torsional Buckling and Modern Developments. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Flexural-torsional buckling
Flexural-torsional buckling analysis
Flexural-torsional buckling theory
Modern development of the theory
Flexural-torsional buckling of columns
Flexural-torsional buckling of curved members
Flexural-torsional buckling of arches
Elastic restraints
Rigid restraints

Applications
Oblique translational restraints
Eccentric translational restraints
Oblique eccentric restraints
Equilibrium, total potential, virtual work and buckling
Finite element method and the buckling of different types of structural elements
Elastic materials
Design and inelastic buckling of steel members
