

# CALL FOR PAPERS

**ICAEM 2021**  
**Mar 22-23, 2021**  
**Istanbul, Turkey**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAEM 2021 : International Conference on Aircraft Engine Manufacturing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Aircraft Engine Manufacturing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |  |                  |
|--|------------------|
| Aircraft engines                                       | Radial engine    |
| Aircraft engine manufacturing                          | Rotary engine    |
| Modeling, analysis, and simulation of aircraft engines | Turbine-powered  |
| The history of aircraft engines and their developments | Turboprop        |
| Aircraft diesel engines                                | Turboshaft       |
| Aircraft engine maintenance                            | Reaction engines |
| Shaft engines  | Jets             |
| Reciprocating (piston) engines                         | Turbojet         |
| In-line engine   | Turbofan         |
| V-type engine  | Pulse jets       |
| Horizontally opposed engine                            | Rocket           |
| H configuration engine                                 |                  |
