

# CALL FOR PAPERS

**ICANMSTA 2021**  
**Mar 22-23, 2021**  
**Istanbul, Turkey**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICANMSTA 2021 : International Conference on Advances in Nano-Micro Satellite Technologies and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Nano-Micro Satellite Technologies and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nano-micro satellites  
Small satellites  
Nano-micro satellite missions  
Earth observation  
Disaster monitoring  
Communication type missions  
Space science and space exploration  
Nano-micro satellite technologies and infrastructure  
Nano-micro satellite architectures  
Component technologies  
Software development

Ground station systems  
Computing and attitude control  
Propulsion  
Cold gas thrusters  
Chemical propulsion  
Electric propulsion  
Solar sail  
Power, telecommunications and thermal management  
Launch opportunities and deployment  
Regulatory and policy issues  
Telecommunication and satellite applications
