

# CALL FOR PAPERS

**ICCCWM 2021**  
**Mar 22-23, 2021**  
**Istanbul, Turkey**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCWM 2021 : International Conference on Cognitive Control and Working Memory is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Cognitive Control and Working Memory. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Cognitive control	Cognitive control of emotion
Cognitive control mechanisms	Attention and cognitive control
Goal-directed behavior	Neurocognitive mechanisms of cognitive control
Executive control	The neural basis of inhibition in cognitive control
Goal-driven decision-making	Consciousness and cognitive control
Cognitive control in task-switching	Working memory, cognitive control, and the prefrontal cortex
Response selection	Stroop test and stroop interference
Response inhibition	Proportion-congruent effect
Cognitive control for uncertainty reduction	Item-specific proportion congruent
Conflict monitoring and cognitive control	Color-naming responses
The role of the dorsolateral prefrontal and anterior cingulate cortex in cognitive control	Process dissociation
The role of the medial frontal cortex in cognitive control	Automatic control of automatic processes
The prefrontal cortex and cognitive control
