

CALL FOR PAPERS

ICCEEA 2021
Mar 22-23, 2021
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCEEA 2021 : International Conference on Ceramics for Environmental and Energy Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ceramics for Environmental and Energy Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ceramic chemistry	Ceramics for environmental and energy applications
Recent advances in ceramic chemistry	Ceramics for medicine, biotechnology and biomimetics
Structure and properties of ceramics	Ceramic and glass materials
Engineering applications and processing challenges	Amorphous materials: common issues within science and technology
Novel applications and manufacturing techniques	Ceramic matrix composites
Advanced ceramics processing	Computational design of ceramic materials
Ceramics materials technology	Glass and optical materials
Novel processing technology	Innovative processing and synthesis of ceramics, glasses, and composites
Advanced engineering ceramics and composites	Multifunctional oxides
Electrical and magnetic ceramics	Phase transformations in ceramics: the present and the future
Transparent ceramics and luminescent materials	Traditional ceramics
Thin-films, membranes and coatings (nanostructured ceramics)	Education in ceramics
Ceramics for energy conversion and storage
