

CALL FOR PAPERS

ICCE 2021
Mar 15-16, 2021
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCE 2021 : International Conference on Crystal Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Crystal Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Crystal engineering
Crystal design and function
Intermolecular interactions
Crystal packing and polymorphism
The holistic crystal
Crystal structure prediction
Crystallization mechanisms
Non-covalent control of structure
Organic solid-state forms
Design of multi-component crystals
Polymorphism
Enantiotropic and monotropic related polymorphs
Property design

Strategies and architectures
Recent advances in crystal engineering
Crystallization solutions
Chemical crystallography
Crystal growth
Crystallography of novel materials
Electron crystallography
Salt cocrystal continuum
Pharmaceutical cocrystals
Hydrogen bridges in crystal engineering
Crystal engineering of diamondoid networks
Crystal engineering applications
