

# CALL FOR PAPERS

**ICMLDLM 2021**  
**Mar 15-16, 2021**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMLDLM 2021 : International Conference on Machine Learning and Deep Learning in Manufacturing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Machine Learning and Deep Learning in Manufacturing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Machine learning for industrial engineering  
Machine learning algorithms for manufacturing  
Machine learning for mass production  
Machine learning in manufacturing  
Machine learning for advancing quality control  
Advantages and challenges of machine learning application in manufacturing

Machine learning algorithms in heavy process manufacturing  
Structuring of machine learning techniques and algorithms  
Unsupervised machine learning in manufacturing  
Reinforcement learning in manufacturing  
Supervised machine learning in manufacturing
