

CALL FOR PAPERS

ICACR 2021
Mar 25-26, 2021
Madrid, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACR 2021 : International Conference on Applications of Cooperative Robotics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Applications of Cooperative Robotics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Cooperative robotics	Co-operative robot systems
Advances in cooperative robotics	Field and underwater robotics
Multiple autonomous robots	Innovative sensing and actuation systems
Supervising multiple autonomous mobile robots	Locomotion, manipulation and gripping
Swarm intelligence	Medical and rehabilitation robotics
Cooperative control of distributed multi agent systems	Robot ethics
Multi robot coordination for robust exploration	Robot modularity
Cooperative control and localization of multiple robots	Service and application specific robots
Network of autonomous robots for fire-fighting	Mobile microrobotics for space exploration
Multi-robot manipulation	Soft robotic systems
Autonomous mobile robots	Wearable robots
Biologically-inspired systems and solutions
