

# CALL FOR PAPERS

**ICAMR 2021**  
**Mar 25-26, 2021**  
**Madrid, Spain**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAMR 2021 : International Conference on Applications of Military Robotics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Applications of Military Robotics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Military robotics  
Military robotics, current uses and developments  
Advantages and disadvantages of military robots  
Ethical and legal concerns about military robots  
Ethical issues regarding artificial intelligence  
Military robotics and operations  
New technologies in military robotics  
Armed robots and unmanned war  
Robotics mechatronics, automation, and system integration

Military robot actuator design  
Military robots and motion control  
Military robot sensor design, fusion, and networks  
Military robot vision, audition, and mechanism design  
Military robot kinematics and dynamics  
Mobile robot, path planning, and navigation for military robots  
Manipulator nano/micro military robots  
Human-robot interaction in military science
