

CALL FOR PAPERS

ICAMR 2021
Mar 25-26, 2021
Madrid, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAMR 2021 : International Conference on Applications of Military Robotics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Applications of Military Robotics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Military robotics
Military robotics, current uses and developments
Advantages and disadvantages of military robots
Ethical and legal concerns about military robots
Ethical issues regarding artificial intelligence
Military robotics and operations
New technologies in military robotics
Armed robots and unmanned war
Robotics mechatronics, automation, and system integration

Military robot actuator design
Military robots and motion control
Military robot sensor design, fusion, and networks
Military robot vision, audition, and mechanism design
Military robot kinematics and dynamics
Mobile robot, path planning, and navigation for military robots
Manipulator nano/micro military robots
Human-robot interaction in military science
