The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBCBM 2021 : International Conference on Biomedical Chromatography and Bioanalysis Methods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biomedical Chromatography and Bioanalysis Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Biomedical chromatography
Chromatographic techniques
Computational biomedicine
Bioanalysis methods
Residue analysis
Clinical analysis
Pharmacokinetics

Pharmacodynamics
Therapeutic drug monitoring
Toxicological analysis
Doping analysis
Sample preparation technology
Data handling and analysis
