

# CALL FOR PAPERS

**ICCSET 2021**  
**Mar 25-26, 2021**  
**Madrid, Spain**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSET 2021 : International Conference on Complex System Engineering and Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Complex System Engineering and Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Complex system engineering	Adaptive and self-managing systems
Agile methods	Cyber-physical systems and internet of things
Model-driven development	Real-time and safety-critical systems
Software architecture	Static and dynamic program analysis and verification
Managed languages and runtimes for multi-language systems	Debugging, testing, and profiling
Big-data analytics frameworks and applications	Security and privacy
Ambient intelligence and pervasive computing	Reverse engineering and refactoring
Ubiquitous computing, context awareness, and sensor networks
