

CALL FOR PAPERS

ICDPR 2021
Mar 25-26, 2021
Madrid, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDPR 2021 : International Conference on Data Processing in Robotics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Data Processing in Robotics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Robotics
- Networked and distributed intelligent control
- Real time supervisory control
- Adaptive control systems
- Embedded systems
- Mobile and autonomous systems
- Virtual systems
- Multi-agent collaborative systems
- Space and underwater robotics
- Entertainment robotics
- Agriculture and field robotics

- Data processing
- Ubiquitous data management and mobile databases
- Data privacy and security
- Semi-structured data and XML databases
- Data mining
- Web data management and deep web
- Workflow, web services
- Stream processing and sensor databases
- Database applications and experiences
- Temporal, spatial, and multimedia databases
- Database system internals and performance
