

# CALL FOR PAPERS

**ICWQAPC 2021**  
**Mar 25-26, 2021**  
**Madrid, Spain**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWQAPC 2021 : International Conference on Water Quality Assessment and Pollution Control is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Water Quality Assessment and Pollution Control. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Water quality assessments
- Water quality assessment processes and technologies
- Water quality assessment methods and materials
- Statistical methods for water quality monitoring
- Water quality assessment and pollution sources
- Remote sensing for water quality applications
- Spatial decision support system for water quality assessment
- Water quality monitoring and distributed measurement systems
- Analysis of water quality data for scientists
- Detecting and estimating trends of water quality parameters
- Statistical tools for analyzing water quality data
- Statistical investigations of groundwater chemical quality
- Assessment of groundwater quality in industrial areas
- Groundwater quality degradation
- Mining and water pollution
- Water quality monitoring and assessment in a developing countries
- Water quality degradation trends
- Water quality improvement
- Water in environmental monitoring
- Microbiological parameters
- Physical parameters
- Harmful chemicals
