

CALL FOR PAPERS

ICCSM 2021
Mar 11-12, 2021
Miami, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSM 2021 : International Conference on Chemistry of Superconducting Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemistry of Superconducting Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Superconducting materials

Novel superconducting materials and applications

Superconductivity, superconductors and superconducting materials

Engineering applications and processing challenges

Novel applications and manufacturing techniques

Chemistry of superconducting materials

Superconductor principles

High-temperature superconductors

Mechanical properties of superconducting materials

Iron-based superconductors

Organic superconductors

Carbon-based materials

Chemical doping effects on superconductivity

New materials

Physical and chemical properties of new superconducting materials

Material synthesis

Heterostructures

Thin films
