

# CALL FOR PAPERS

**ICCCSTA 2021**  
**Mar 29-30, 2021**  
**Paris, France**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCSTA 2021 : International Conference on Cell Culture Systems, Technologies and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Cell Culture Systems, Technologies and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Cell culture technologies  
Mammalian cell culture  
Applications of cell culture  
Cell culture in two dimensions  
Cell culture in three dimensions  
3D cell culture in hydrogels  
3D cell culturing by magnetic levitation  
Tissue culture and engineering  
Vaccines  
Culture of non-mammalian cells  
Plant cell culture methods  
Insect cell culture

Bacterial and yeast culture methods  
Viral culture methods  
Cell line development advances  
Impact of process conditions on product quality  
Advanced cell culture process controls and modeling  
Scale-up and scale-down challenges for cell culture-based manufacturing  
Integrated continuous process development for cell culture  
Non-protein products of cell culture  
Current concerns and emerging trends in cell culture bioprocessing  
Quality by design and scale-down model qualification  
Novel protein formats
