

# CALL FOR PAPERS

**ICAALCS 2021**  
**Mar 22-23, 2021**  
**Prague, Czechia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAALCS 2021 : International Conference on Advanced Applications of Lightweight Composites and Structures is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Applications of Lightweight Composites and Structures. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Lightweight composites and structures with high load bearing capacity  
Lightweight composites and structures with thermal protective behavior or explosion protection behavior  
Lightweight composites and structures with wave absorbing or transmitting behavior

Lightweight composites and structures with low thermal expansive or negative Poisson's ratio  
Additive manufacturing of lightweight composites and structures  
Advanced characterization methods and equipment for lightweight composites and structures
