

CALL FOR PAPERS

ICAGN 2021
Mar 22-23, 2021
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAGN 2021 : International Conference on Advances in Green Nanotechnology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Green Nanotechnology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Green nanotechnology
Clean and green nanotechnology
Green nanoelectronics
Green synthesis of nanomaterials
Green nanomanufacturing
Nano-enhanced green technology
Nano-enhanced energy technologies
Nano-enhanced clean-up technologies
Nano-enhanced green industry technologies
Green nano policy
Challenges and opportunities to green nanotechnologies
Novel nanomaterials and devices
Nanomaterials for building and construction

Nanomaterials for energy conversion
Nanomaterials for solar cells, fuel cells, batteries, and so forth
Nanostructures for phase-change materials
Nanomaterials for environment protection or improvement
Energy and environment relevant nanotechnology
Nanotechnology for electrochemical conversion and energy storage
Nanotechnology for hydrogen production and storage
Nanotechnology for photocatalysis and environmental catalysis
Nanotechnology for water treatment, decontamination, in-door air purification, air pollution, and so forth
Environment, human health, and safety issues of nanotechnology
Green nanotechnology
Recent trends in nanotechnology
