

CALL FOR PAPERS

ICAIWM 2021
Mar 22-23, 2021
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAIWM 2021 : International Conference on Adaptive and Integrative Water Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Adaptive and Integrative Water Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Concepts and paradigms
Water management regimes
Experience in practical cases
Comparative case study analysis
Methods for comparative analysis of adaptive water management regimes
Ecosystem water requirements and ecosystem services
Institutions to allocate water to nature
Concepts and methods to deal with uncertainty
Experience from practical cases in water management

Connecting theory with practice
Linking levels in water governance from local to global
What makes water governance adaptive
Role of participation and informal institutions
Transboundary governance regimes
Multi-level water governance:
Coping with problems of scale
Vulnerability assessment
Adaptive capacity, resilience
Limits to adaptation
