

CALL FOR PAPERS

ICBER 2021
Mar 22-23, 2021
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBER 2021 : International Conference on Bioremediation Engineering and Research is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Bioremediation Engineering and Research. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Bioremediation
Bioremediation engineering
Development of bioremediation
Environmental bioremediation technologies
Bioremediation of soil and water sources
Application of bioremediation on solid waste management
Bioremediation process
Energy biotransformation
Environmental variations in field
Bioremediation of pesticide in surface soil treatment
Bioremediation of pesticides using scale up process bioreactors

Bioremediation of benzene using a designed and developed partitioning bioreactor
Biodegradation of petroleum hydrocarbon compounds
Bioremediation of heavy metals
Bioremediation of agricultural waste
Phytoremediation
Bioleaching
Bio augmentation
Genetic engineering approaches
Mycoremediation
In-situ bioremediation
Ex-situ bioremediation
