

CALL FOR PAPERS

ICDMRACE 2021
Mar 22-23, 2021
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDMRACE 2021 : International Conference on Decision Making and Risk Assessment in Civil Engineering is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Decision Making and Risk Assessment in Civil Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Decision making methods and applications in civil engineering
Systematic decision-making in civil engineering
Concepts and techniques for decision making
Civil engineering projects
Selecting building design
Selecting appropriate delivery system
Selecting appropriate construction method
Multiple criteria decision making methods

Advances and applications in civil engineering
Safety and security methods in formal decision making
Uncertainty and sensitivity analysis of the reliability tasks of civil engineering structures
Decision making techniques classifications
The most applied decision making techniques to civil engineering projects
Fuzzy logic combined with decision making techniques
Applications of decision making techniques to civil engineering projects
