

CALL FOR PAPERS

ICEBT 2021
Mar 22-23, 2021
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEBT 2021 : International Conference on Environmental Bioremediation Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Environmental Bioremediation Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Environmental bioremediation technologies	Bioremediation of benzene using a designed and developed partitioning bioreactor
Bioremediation process and bioremediation engineering	Biodegradation of petroleum hydrocarbon compounds
Development of bioremediation	Bioremediation of heavy metals
Environmental bioremediation technologies	Bioremediation of agricultural waste
Bioremediation of soil and water sources	Phytoremediation
Application of bioremediation on solid waste management	Bioleaching
Bioremediation process	Bio augmentation
Energy biotransformation	Genetic engineering approaches
Environmental variations in field	Mycoremediation
Bioremediation of pesticide in surface soil treatment	In-situ bioremediation
Bioremediation of pesticides using scale up process bioreactors	Ex-situ bioremediation
