

# CALL FOR PAPERS

**ICHEBDT 2021**  
**Mar 22-23, 2021**  
**Prague, Czechia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHEBDT 2021 : International Conference on Human Evolution, Biological Diversity and Threats is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Human Evolution, Biological Diversity and Threats. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

|   |  |
|---|--|
| Biodiversity  | Number of species  |
| Biological diversity                                | Species loss rates   |
| Evolution and history                               | Threats  |
| Evolutionary diversification                        | Habitat destruction  |
| Biodiversity and ecosystem services                 | Introduced and invasive species                            |
| The balance of evidence                             | Genetic pollution  |
| Services enhanced by biodiversity                   | Overexploitation   |
| Biodiversity and agriculture                        | Hybridization, genetic pollution/erosion and food security |
| Biodiversity and human health                       | Climate change   |
| Biodiversity, business and industry                 | Human overpopulation                                       |
| Biodiversity, leisure, cultural and aesthetic value | The holocene extinction                                    |
| Biodiversity and ecological services                | Conservation   |
