

CALL FOR PAPERS

ICETN 2021
Mar 04-05, 2021
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICETN 2021 : International Conference on Electronic Transport in Nanostructures is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electronic Transport in Nanostructures. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Transport in nanostructures
Quantum confined systems
Quantum transport in nanostructures
Transmission in nanostructures
Quantum dots
Single electron phenomena

Diffusive transport
Temperature decay of fluctuations
Non-equilibrium transport and nanodevices
Fabrication of nanostructures
Characteristic length scales
Diffusive transport
