

CALL FOR PAPERS

ICGCAL 2021
Mar 04-05, 2021
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGCAL 2021 : International Conference on Geospatial Computing, Applications and Limitations is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geospatial Computing, Applications and Limitations. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mobile geospatial computing	Developing mobile geospatial web applications
Geospatial computing in mobile devices	Positioning
Geospatial analysis	Presentation
Mobile geomatics	Spatial selection
Geospatial information technologies	Environment model
Traditionally geospatial computing	Mobile geospatial applications
Geospatial information technologies for mobile field data collection	Local visibility model
Capturing and processing geospatial information in the field	Occlusion detection
Local processing of geospatial information on mobile devices	Geospatial user interfaces
Cloud-based geospatial computing	Limitations
