

# CALL FOR PAPERS

**ICGCSS 2021**  
**Mar 04-05, 2021**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGCSS 2021 : International Conference on Geospatial Computing and Spatial Selection is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geospatial Computing and Spatial Selection. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Mobile geospatial computing
- Geospatial computing in mobile devices
- Geospatial analysis
- Mobile geomatics
- Geospatial information technologies
- Traditionally geospatial computing
- Geospatial information technologies for mobile field data collection
- Capturing and processing geospatial information in the field
- Local processing of geospatial information on mobile devices
- Cloud-based geospatial computing

- Developing mobile geospatial web applications
- Positioning
- Presentation
- Spatial selection
- Environment model
- Mobile geospatial applications
- Local visibility model
- Occlusion detection
- Geospatial user interfaces
- Limitations
