

# CALL FOR PAPERS

**ICHDMEBM 2021**  
**Mar 04-05, 2021**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHDMEBM 2021 : International Conference on Health Data Mining and Evidence-Based Medicine is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Health Data Mining and Evidence-Based Medicine. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

|  |   |
|--|---|
| Health data mining                               | Healthcare decision-making                      |
| Data mining in health informatics                | Disease management                              |
| Applications of data mining                      | Feedback integration                            |
| Clinical care                                    | Challenges of data mining in health informatics |
| Data mining in clinical decision support systems | Legal and ethical issues                        |
| Administration of health services                | Data mining for healthcare management           |
| Medical research                                 | Challenges in data mining for healthcare        |
| Data warehousing in health informatics           | Prominent models                                |
| Data warehouses vs. real-time databases          | Future directions                               |
| Evidence-based medicine                          |   |
