

CALL FOR PAPERS

ICAICS 2021
Mar 29-30, 2021
Singapore, SG

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAICS 2021 : International Conference on Advances in Intelligent Computing Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Intelligent Computing Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Intelligent computing systems

Neural networks

Bayesian learning

Bioinformatics

Classification and clustering

Kernel machines

Feedforward models

Natural language and speech processing

Feature extraction and dimension reduction

Deep learning

Reinforcement learning

Image processing

Computer vision

Robotics

Signal processing

Recurrent networks and dynamical systems

Hybrid learning systems

Self-organizing maps

Statistical and mathematical aspects of artificial intelligence

Optimization methods in learning

Data mining

Fuzzy systems

Evolutionary computation

Ontologies
