

CALL FOR PAPERS

ICBICC 2021
Mar 29-30, 2021
Singapore, SG

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBICC 2021 : International Conference on Biological and Inorganic Copper Chemistry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biological and Inorganic Copper Chemistry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Copper chemistry	Oxidation of copper
Biological and inorganic copper chemistry	Reactions of copper
Bioinorganic chemistry of copper	Reactions of hexaaquacopper ions with hydroxide ions
Occurrence and extraction of copper	Reactions of hexaaquacopper ions with ammonia solution
Pyrometallurgical method and hydrometallurgical method	The reaction of hexaaquacopper ions with carbonate ions
Mining, milling, smelting and refining	The reaction of hexaaquacopper ions with iodide ions
Properties of copper	Melting and casting
Uses of copper and its compounds	Melting technology
Copper compounds	Fire refining
Copper halides	Electrorefining
Copper oxides	Collection and processing of recycled copper
Copper toxicity and chemistry in the environment
