

CALL FOR PAPERS

ICCCAMM 2021
Mar 29-30, 2021
Singapore, SG

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCAMM 2021 : International Conference on Classifications, Characterization and Applications of Metallic Alloys is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Classifications, Characterization and Applications of Metallic Alloys. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Metal alloys

Pure metals and metal alloys

Metal alloys applications and processing

Classifications, characterization and applications of metallic alloys

Metals, alloys and metal compounds

Chemistry of metals and alloys

Ferrous alloys

Advanced metals and alloys

Advanced materials for magnetic cooling

Magnetic alloys and intermetallics

Precipitation hardening of metal alloys

Structure and properties of metal alloys

Metal additive manufacturing

Metals for biomedical applications

Metal corrosion and prevention methods

Light metal alloys

Classifications of metal alloys

Solidification

Structure of alloys

Types of metallic alloys

Aluminum alloys

Shape memory alloys

Soldering alloys

Advanced welding

Metal alloys

Dissimilar weld
