

# CALL FOR PAPERS

**ICCUC 2021**  
**Mar 29-30, 2021**  
**Singapore, SG**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCUC 2021 : International Conference on Chemistry of Uranium Complexes is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemistry of Uranium Complexes. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Uranium chemistry  
Depleted and natural uranium  
Chemical forms of uranium  
Nuclear properties of uranium  
Characteristics of uranium and its compounds  
Chemical thermodynamics of uranium  
Ore processing and separation  
Properties of free atoms and ions  
Uranium metal  
Compounds of uranium

Chemical bonding in uranium compounds  
Structure and coordination chemistry of uranium complexes  
Uranium complexes in solution and the solid state  
Uranium chemistry in solution  
Organometallic and biochemistry of uranium  
Analytical chemistry of uranium  
The radiochemistry of uranium  
Toxicology of depleted uranium  
Chemical and radiological toxicity of uranium
