

CALL FOR PAPERS

ICEORSGT 2021
Mar 29-30, 2021
Singapore, SG

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEORSGT 2021 : International Conference on Earth Observation, Remote Sensing and Geomatic Technology is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Earth Observation, Remote Sensing and Geomatic Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Earth observation
Numerical measurements
Future intelligent earth observing satellites
Design of intelligent satellites
Data management
Appropriate geomatic technology for local earth observation
Technical alternatives for local earth observation
Applications
Community based conservation
Global positioning system (GPS)
Digital frame cameras
Future directions

Photos and radar or sonar images taken from ground or ocean-based instruments
Photos and radar images taken from remote-sensing satellites
Decision-support tools based on processed information
Maps and models
Remote Sensing
Geospatial Data
Earth observation satellites
Satellite acquisitions
Sensors and band designations
Applications of landsat data
Landsat data products and processing
