

CALL FOR PAPERS

ICBSRR 2021
Mar 29-30, 2021
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBSRR 2021 : International Conference on Bioelectrochemical Systems for Resource Recovery is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Bioelectrochemical Systems for Resource Recovery. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Bioelectrochemical systems
Bioelectrochemistry
Advances in bioelectrochemical systems
Potential applications of bioelectrochemical systems
Sustainable energy production and product recovery
Wastewater treatment
Hydrogen production from wastewater
Energy production and electrosynthesis
Cost-effective production of useful chemicals
Environmental and industrial biotechnology

Microbial energy production from biomass
Enzymatic fuel cells and their complementarities
Genetically modified microorganisms for bioelectrochemical systems
Electrochemical losses
Electrochemical techniques for the analysis of bioelectrochemical systems
Technological factors affecting bioelectrochemical systems performance
Bioelectrochemical reductions in reactor systems
Materials for bioelectrochemical systems
Bioelectrochemical systems for subsurface
