

CALL FOR PAPERS

ICHEIHCP 2021
Mar 29-30, 2021
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHEIHCP 2021 : International Conference on Hospital Engineering Innovations and Health Care Productivity is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Hospital Engineering Innovations and Health Care Productivity. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Hospital engineering innovations
Medical technology innovations
Health information technology innovations
Medical equipment innovations
Imaging technology
Innovations in medical imaging and virtual microscopy
Medical technology management
Health technology assessment of medical devices
Health technology regulation
Health technology assessment in health systems
International collaboration in health technology assessment
Challenges for using health technology assessment in developing and emerging countries
Strategies for developing health technology assessment

Basic health technology frameworks
Health information technology
Costs and benefits of health information technology
Problems with health information technology
Health care quality or effectiveness
Health care productivity or efficiency
Medical errors and health care accuracy
Health care costs
Administrative efficiencies and healthcare work processes
Clinical point of care technology
Technological innovations, opportunities and challenges
Patient billing
Accounting systems
