

CALL FOR PAPERS

ICHRSQM 2021
Mar 29-30, 2021
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHRSQM 2021 : International Conference on Health System Reengineering, Statistical and Quantitative Models is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Health System Reengineering, Statistical and Quantitative Models. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Health system reengineering
The role of reengineering in health care delivery
Re-engineering application in healthcare
Reengineering nursing and health care
Reengineering for health-care system
Health system performance assessment
Healthcare systems optimization
Healthcare delivery, measurement and modeling
Statistical and quantitative models
Healthcare delivery systems
Healthcare systems modeling
Medical information
Healthcare industry

Health information systems
Production and health care system
Health care management operations
Assessment of medical technologies
Patient-centered systems
Roles in healthcare products, systems and delivery
Engineering design and product development
Regulatory science
Risk science and failure analysis
Economic analysis, reimbursement/payment models, and value engineering
Information technology and software
Public policy and management science
Other applications: beyond healthcare-oriented areas
