

CALL FOR PAPERS

ICAC 2021
Mar 25-26, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAC 2021 : International Conference on Asynchronous Communication is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Asynchronous Communication. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Asynchronous communication
Physical layer
Data link layer and higher
Application layer
Information theory
Information source
Information measure
Information management
Electronically mediated
communication
Asynchronous message passing system
models
Process models
Time and the process channel model

Synchronous systems
Monitoring models
Processes and events
Local and global states
Process coordination
Time, time intervals and global
time
Cause-effect relationship,
concurrent events
Logical clocks
Message delivery to processes
Process algebra
Final remarks on process models
