

CALL FOR PAPERS

ICAGMT 2021
Mar 25-26, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAGMT 2021 : International Conference on Advances in Groundwater Monitoring Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Groundwater Monitoring Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Groundwater monitoring	Impact of land use and climate change
Groundwater monitoring and remediation	Groundwater systems management
Surface water/groundwater/ecosystem interactions	Surface contamination of shallow and deep aquifers
Water level declines or rises	Impacts of mining
Water quality in aquifers	Hydraulic fracturing
Groundwater flow characterisation	Groundwater protection
Contaminant load modeling	Disposal of brines produced with oil and gas extraction
Leaching to groundwater	Deep injection of waste water
Aquifer storage and recovery	Confined and unconfined aquifers
Integrated modelling of groundwater systems
