

CALL FOR PAPERS

ICAHRGM 2021
Mar 25-26, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAHRGM 2021 : International Conference on Advances in High-Resolution Geophysical Methods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in High-Resolution Geophysical Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Marine Geophysics
Marine Geotechniques
Echo Sounders
Side Scan Sonar
Subbottom Profilers
Seismic Sources

Single Channel Seismic Reflection
Systems
Multifold Acquisition and Digital
Processing
Marine Magnetometers
Marine Geoengineering Hazards
Survey Organization, Navigation,
and Future Developments
