

CALL FOR PAPERS

ICALMAFR 2021
Mar 25-26, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICALMAFR 2021 : International Conference on Advanced Livestock Management and Animal Feed Resources is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Livestock Management and Animal Feed Resources. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Livestock health: problems and challenges
Livestock production and management
Emerging and re-emerging infectious and zoonotic diseases
Diagnostics, prognostics and therapeutics
Neonatal health care and herd management
Trends in molecular diagnosis
Role of women in livestock production
Role of indigenous livestock in sustainability
Climate change and adaptation options for sustainable livestock production
Veterinary extension services and awareness
Accreditation and attestation of veterinary institutes

Devising course curricula for global challenges
Integration of animal Welfare in veterinary education
Nutritional strategies and requirements in climate change scenario
Livestock production systems in tropics
Animal feed resources and forage conservation
Breeding strategies for sustainability
Physiological particularities of livestock
Assisted reproductive techniques
Endocrine disruptors and developing world
Optimal fertility rate of livestock in developing nations
