

# CALL FOR PAPERS

**ICBEE 2021**  
**Mar 25-26, 2021**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBEE 2021 : International Conference on Biotechnology in Energy and Environment is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biotechnology in Energy and Environment. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |   |   |
|---|---|
| Environmental engineering and sustainable development | Environmental dynamics                                |
| Process design and optimization                       | Meteorology   |
| Product innovation, development and economics         | Hydrology   |
| Process intensification                               | Geophysics  |
| Nanotechnology  | Atmospheric physics                                   |
| New materials and structured products                 | Physical oceanography                                 |
| Intelligent polymers                                  | Global environmental change and ecosystems management |
| Green organic synthesis routes                        | Climate and climatic changes                          |
| Process integration                                   | Global warming  |
| Environmental engineering and management              | Ozone layer depletion                                 |
| Sustainable and clean technologies                    | Carbon capture and storage                            |
| SCF as solvent substitutes                            | Biofuels  |
| Environmental Science and Technology                  | Integrated ecosystems management                      |
