

# CALL FOR PAPERS

**ICDHPVT 2021**  
**Mar 25-26, 2021**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDHPVT 2021 : International Conference on Developments in High Voltage Power Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Developments in High Voltage Power Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

High voltage power systems	Generation of high voltages
High voltage engineering	Direct, alternating and impulse voltages
Simulation and evaluation of high-voltage power systems	Measurement of high voltages
High voltage power distribution and storage	Electrostatic voltmeters
High voltage power system management maintenance	Generating voltmeters and field sensors
Electrical power transmission system and networks	Electrostatic fields and field stress control
High voltage power systems research	Electrical breakdown in gases
Electric power transmission and distribution systems	Breakdown in solid and liquid dielectrics
High-voltage bushings	Non-destructive insulation test techniques
Generation and transmission of electric energy	Overvoltages, testing procedures and insulation coordination
Voltage stresses and testing voltages	Design and testing of external insulation
