

CALL FOR PAPERS

ICAIT 2021
Apr 22-23, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAIT 2021 : International Conference on Advances in Infocomm Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Infocomm Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Infocomm technology
- Fiber technologies
- Photonic structures and sensor technologies
- Biophotonics
- Optical and wireless network technologies
- Space communications, navigation and tracking
- Infocommunication technologies and networks
- Communication networks and systems administration
- Telecommunication systems theory and applications
- Control, adaptation, self-organization in infocommunication systems
- Software-defined networking
- Constructing, design and planning methods for infocommunication systems
- Mobile infocommunication systems and signal processing
- Information security in infocommunication systems
- Applications of fractal and chaos in infocommunication technologies
- Information and communication technology
- Telecommunication and information processing
- Electronic communications
- Internet technology
- Integrated information processing and content management
- Classical telecommunications and information technology
- Media technologies and media communications
- Telecommunications, digital broadcasting and information technology
- User computer systems and devices
- Office network and devices
- Network server and services
