

CALL FOR PAPERS

ICTATCM 2021
Apr 22-23, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTATCM 2021 : International Conference on Thermal Analysis Techniques for Construction Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Thermal Analysis Techniques for Construction Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Thermal analysis of construction materials

Thermoanalytical techniques

Portland cement concrete

Formation and hydration of cement and cement compounds

Concrete admixtures

Accelerating admixtures

Retarding and water reducing admixtures

Superplasticizing admixtures

Supplementary cementing materials and other additions

Non-portland cement binders and concrete

Non-portland rapid setting cements

Gypsum and gypsum products

Clay-based construction projects

Organic construction materials

Sealants and adhesives

Roofing materials

Paints and coatings
