

CALL FOR PAPERS

ICNSS 2021
Apr 22-23, 2021
Boston, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNSS 2021 : International Conference on Networked Sensing Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Networked Sensing Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Theoretical Study on Networked Sensing Systems
Applications of Networked Sensing Systems
Prototypes, Field Studies & Test beds for Networked Sensing Systems
Safety and Security of Networked Sensing Systems
Data Management for Networked Sensing Systems
Middleware for Networked Sensing Systems
Self-Organizing Networked Sensing Systems and Autonomic/Bio-Inspired Systems
Intelligent Sensing Systems

Sensor Phenomena and Modeling
Sensors and Sensing Systems
Sensors and Actuators for Smart Meter and Smart Grid Applications
Human Behavior Sensing and Ambient Support
Human Health Monitoring and Biomedical Measurement
Measurement and Control Issues in Networked Sensing Systems
Networked Sensing Systems involving Haptic Interactions
Materials, Design, Fabrication, and Packaging of Sensors
