

# CALL FOR PAPERS

**ICPFST 2021**  
**Apr 22-23, 2021**  
**Boston, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPFST 2021 : International Conference on Proteomics in Food Science and Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Proteomics in Food Science and Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Proteomics in food science  
Postharvest proteomics of perishables  
Proteomics of rice  
Proteomics, maize biology and maize crop  
Proteomics of wheat flour  
Barley grain proteomics  
Proteomics of soybean plants  
Proteomics of hazelnut  
Application to farm animals  
Proteomics in farm animal care and food production  
Proteomics of color in fresh muscle foods  
Proteomic investigations of beef tenderness  
Protein modifications in cooked pork products

Poultry and rabbit meat proteomics  
Proteomic characterization of nonenzymatic modifications  
Proteomics of egg white  
Proteomics in aquaculture  
Proteomics to assess fish quality and bioactivity  
Proteomic identification of commercial fish species  
Food authentication of seafood species  
Proteomic analysis of disease in sydney rock oysters  
Processed foods  
Proteomics of fermented milk products  
Proteomic analysis of beer  
Proteomics of grapevines and wines
