

CALL FOR PAPERS

ICCRSM 2021
Apr 26-27, 2021
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCRSM 2021 : International Conference on Carbonate Reservoirs and Stochastic Mapping is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Carbonate Reservoirs and Stochastic Mapping. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Carbonate reservoir
characterization
Seismic expression of carbonate
reservoir systems
Seismic reservoir characterization
Core analysis and its application
in reservoir characterization
Formation evaluation
Performance and classification of
carbonate reservoirs
Well test analysis in carbonate
reservoirs
Naturally-fractured carbonate
reservoirs
Chalk reservoirs
Hydrocarbon reservoirs in karsted
carbonate rocks
Fundamentals of surface and
capillary forces
Petrophysical rock properties

Rock-fabric classification
Wireline logs
Depositional textures and
petrophysics
Reservoir models for input into
flow simulators
Limestone reservoirs
Dolostone reservoirs
Touching-vug reservoirs
Sequence stratigraphy of carbonate
reservoirs
High-frequency anomalies in
carbonate reservoir
characterization
Petrophysical flow units in
carbonate reservoirs
Geological/stochastic mapping of
heterogeneity in a carbonate
reservoir
