Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAQC 2021 : International Conference on Applications of Quasiperiodic Crystals is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Applications of Quasiperiodic Crystals. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Quasiperiodic crystals  
The quasicrystallographic  
restriction  
Crystallography of quasiperiodic  
crystals  
The symmetry of quasiperiodic  
crystals

Stable quasicrystals  
Metastable quasicrystal  
Electrical and thermal  
conductivity  
Potential applications of  
quasiperiodic crystals
