

# CALL FOR PAPERS

**ICCECADM 2021**  
**Apr 29-30, 2021**  
**Jerusalem, Israel**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCECADM 2021 : International Conference on Computational Electromagnetics and Computer-Aided Design Methods is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Electromagnetics and Computer-Aided Design Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computational electromagnetics  
Computational electromagnetics and applications  
Computational electromagnetics and electrodynamics  
Integral equation solvers  
The discrete dipole approximation  
Computer-aided methods  
Computer-aided design  
Electromagnetic simulators  
Field-solving methods

Maxwell's equation-based methods  
Optics-based methods  
Finite element method  
Method of moments  
Finite difference time domain  
Transmission line matrix  
Validation  
Light scattering codes
